

Hazardous Child Labor in the World

*The incredible story of Pharady.
We interviewed Pharady and her family,*

Child Labor is generally defined as work .Child labor is illegal and immoral. The children are exploited and abused. 200 million children work and 126 million of those are forced into hazardous work.

Pharady's life is horrible. She wakes up early in the morning to help her family. She pulls a tank filled with water with her mother and her sister to earn 450 cents/day. At 6 am, she's going to the brick factory until 6 pm. She works under 35°C since 5 years because her father was sick, he died 3 years ago. She can't go to school, but she dreams of being a teacher.

So, we must warn you about child labour. We have an idea to stop that : control strictly child labour !
